

Our Company Profile

SIMEC Engineering Ltd (“Company”) is a mechanical and electrical contractor who provides services to the life science, technology, energy and resource sectors.

Our Mission

Our Company is committed to undertaking its business in a manner that recognises the importance of environmental protection and sustainability.

Our Vision

To develop an innovative and environmentally friendly culture that extends to all organisational levels and is adopted by all Employees, including those that provide contractual services to the Company.

Our Accountability

Senior Management, starting with the Director are accountable and committed to providing an environmental responsible workplace and delegates the responsibilities for the implementation and application of associated policies, procedures, plans and programs to the functional managers and supervision across our company and those of our contractors.

All our employees, visitors, contractors and other interested parties are responsible to reduce environmental risk by abiding by the established management system. This management system is legally compliant, appropriately sized for the context of our business, its scope of work, and the nature of the risks and opportunities have specific responsibilities to reducing environmental harm across all company related activities.

Our Commitments:

We are committed to minimising the environmental harm impacts across our operations by:

- Complying with all relevant legislative requirements in relation to environmental issues
- Managing environmental and related issues in accordance with ours and our clients requirements, policies and procedures
- Identifying and proactively managing our environmental hazards which may pose risks to the community, environment or property
- Identifying, reporting, investigating and resolving all environmental incidents and non-conformances to prevent recurrence
- Increasing environmental awareness amongst our employees and contractors
- Striving for continual improvement in our environmental sustainability journey
- Undertaking our operations using minimum environmental impact methodologies wherever practicable
- Using waste management hierarchy to improve our resource efficiency and reduce the total proportion of our waste sent to landfill
